

The vertical-AI sales operating system for the 1,200 micro-industries ZoomInfo and Apollo overlook.

Deployed multi-tenant platform. White-label provisioning in hours. \$1,500 data / \$4,500 booking / JV close-and-share — already in production.

THE PROBLEM

B2B data is a commodity. Outcomes are not.

Every SMB and operator needs the same thing — to know which prospects are actually about to buy. But the existing data layer is broken for everyone outside the Fortune 1000.

\$30k+/yr

ENTERPRISE DATA COST

ZoomInfo, 6sense, Cognism — priced for the F1000, unreachable for the 30M US small businesses that need leads most.

5–7×

LEAD RESALE COUNT

Apollo, Optimal Blue, LendingTree triggers — every "lead" is sold to 5–7 buyers in the same ZIP. Race to the bottom.

1,200+

UNDERSERVED VERTICALS

From commercial roofing to bio-3D printing — too small for ZoomInfo's GTM, too specialized for generic Apollo lists.

SMBs don't want *data*. They want **booked meetings and closed revenue**. The market sells the wrong thing.

THE SOLUTION

One shared data engine. A portfolio of branded niche sales stacks.

Customers buy a sharp niche brand — "Pipeline.Weekly for SaaS sales," "SolarSignal for installers," "MortgageHeat for brokers" — that delivers ZIP-exclusive leads, AI booking, or full close-and-share. They never see r0cketship.

\$1,500 — Data

Predictive intent + ZIP exclusivity + CRM sync (HubSpot, GHL, Salesforce, Pipedrive, Close, Zoho) + DNC-clean + 5-yr retrospective.

~85% gross margin · self-serve via funnel

\$4,500 — Booked Meetings

Everything in Data + AI-assisted real-time appointment setting on their calendar. The profit center.

~55% gross margin · 3x price for 3x value

JV — Close & Share

\$4,500 base + 10–25% of closed revenue. We are their sales team. Backend success fee creates outlier MRR per logo.

30–50% margin + upside · valuation multiplier

One platform → unlimited niche brands. P&G has 80 SKUs from one chemistry lab. **We're P&G for B2B sales intelligence.**

WHY NOW

Three converging forces. A 24-month window.

AI booking

PRODUCTIVITY UNLOCK

Voice AI + LLM dialing now hits human-quality conversion at 1/10th the cost. A solo operator can run what used to take a 5-person inside-sales team.

iOS / Cookie death

1ST-PARTY DATA PREMIUM

Apple ATT + Chrome cookie deprecation made 1st-party intent data the most valuable asset in B2B marketing. We own the source.

Vertical SaaS wave

NICHE DOMINANCE

Generic horizontal SaaS is saturated. The next \$100B in software is vertical specialists. Sales intelligence will be no different.

The first mover that builds a **repeatable vertical-launch playbook** + AI-powered closing motion wins all 1,200 niches. We are 14 build phases ahead.

THE PLATFORM

Already deployed. 14 phases shipped. Production-grade.

This is not a slideware company. The platform is live on production infrastructure, handling real traffic, processing real transactions.
