

RICHES IN NICHES · VERTICAL-AI SALES OS

The sales operating system for the **1,200 micro-industries** ZoomInfo and Apollo refuse to touch.

A deployed multi-tenant platform that spins up a branded, niche-specific white-label in under an hour — each one selling exclusive-ZIP predictive data, done-for-you booking, and AI-assisted closing to the specialty SMBs that horizontal data tools ignore. One data engine. Unlimited verticals. 60% of every sale flows to r0cketship.

\$2B+

Aggregate ARR opportunity across the top micro-niches

1,200+

Underserved specialty B2B verticals

60%

Platform take rate on every white-label sale

Build phases shipped — platform live in prod

— THE PROBLEM

ZoomInfo and Apollo sell generic, per-seat data to the same 1,000 Fortune accounts. Aggregators resell every "lead" to 5–7 buyers in the same ZIP — a race to the bottom. That leaves **\$2 billion+** of micro-niche revenue on the table every year: verticals too small for ZoomInfo, too specialized for Apollo, too valuable to ignore.

— THE MODEL — THREE-TIER LADDER

TIER	MONTHLY	WHAT'S INCLUDED
Data	\$1,500	ZIP-exclusive predictive data, delivered to CRM
Booking	\$4,500	Done-for-you outreach → booked meetings
JV	Rev-share	We co-sell; share of closed business

\$42k blended ACV. 60/40 platform/partner split already coded into every transaction. Multi-ZIP expansion built in.

— WHY WE WIN

Operating leverage: one predictive data + mailbox engine powers unlimited niches — customer growth no longer equals cost growth. **Owned infrastructure** (data, deliverability, dialer) and a new **autonomous ad-exchange** that monetizes the same email volume a second time. One niche per week to category dominance.

— PRODUCT & TRACTION — ALREADY BUILT

- ✓ Multi-tenant platform deployed & live; new white-label spun up via wizard in **<1 hour**, no engineering.
- ✓ Proprietary **predictive lead engine**, AI dialer, billing, coupons, and partner program operational.
- ✓ **25 branded niche sites provisioned**; first cohort live with HTTPS (roofers.co leading).
- ✓ **Autonomous outreach engine live** — every lead auto-emailed, dripped over 5–7 days, deliverability-protected.
- ✓ Email **ad-exchange in build** — advertisers bid per click; eCPM optimizer maximizes \$/1k emails.

— PATH TO \$1B

YEAR 1
\$5M

52 niches live · platform deployed

YEAR 2
\$25M

100+ verticals · category awareness

YEAR 3
\$100M

2,400 customers @ \$42k · Series B

YEAR 5
\$250M+

200+ verticals · the default stack

Valuation ladder: **\$250M** @ \$30M ARR · **\$1B** @ \$100M ARR · **\$2B** @ \$200M ARR (10× multiple). We don't need all 1,200 — **1% capture is a \$200M ARR business.**

Raising a **\$3–5M seed** to fund the 52-week deployment.

One new niche white-label every Monday. The 14-phase platform is already deployed — this capital buys go-to-market, not R&D.
